CME Accreditation

This Group Learning program has been certified by the College of Family Physicians of Canada and the Ontario Chapter for up to 14.5 Mainpro+ credits. (ID#190306)

This event is an Accredited Group Learning Activity (Section 1) as defined by the Maintenance of Certification Program of the Royal College of Physicians and Surgeons of Canada and approved by the University of Ottawa's Office of Continuing Professional Development. You may claim a maximum of 14.5 hours (credits are automatically calculated).

Members of the American Academy of Family Physicians are eligible to receive up to 14.5 credit hours for attendance at this meeting/event due to a reciprocal agreement with the College of Family Physicians of Canada.

Through an agreement between the Royal College of Physicians and Surgeons of Canada and the American Medical Association, physicians may convert Royal College MOC credits to AMA PRA Category 1 Credits™. More information on the process to convert Royal College MOC credit to AMA credit.

Overall learning objectives of the Health Summit are:

- Identify and analyze areas of concern to physicians' communities of practice to enhance comprehension of current health care issues and build broader communities of knowledge related to the medical profession;
- Achieve alignment in direction and approach (from the perspective of the medical profession) on moving toward a health care system that is connected and is patient-focused;
- Identify opportunities where they can advocate for areas of action to physician colleagues and key influencers to achieve better outcomes and plan for future changes to the physician's professional environment;
- Develop tangible outcomes (e.g., strategic direction, policy papers, blueprint for action) that will enable the medical community to advocate in moving toward a health care system that is connected and patient focused.

MONDAY - August 12, 2019

Fitness Session

Dr. Darby Ewashina
Dr. Marie-Claire Bourque
7:00 - 7:40

Limbus is a unique group fitness workout that uses music, emotional cues, and repetitive movements intentionally combined to provide participants with a total mind body experience.

Keynote Presentation

Dr. Alejandro Jadad
8:00 - 8:45

What Do We Mean by Health?

Opportunities to re-imagine medicine in the digital age

This session will explore how a new conceptualization of health can transform medicine and the healthcare experience for all involved, while harnessing the power of digital tools.

In this session participants will:

- describe the evolution of the meaning of “health” in the past 70 years;
- Discuss how a new concept of health could lead the transformation of medicine, and the emergence of new services to improve outcomes and equity effectively;
- Identify opportunities to re-imagine, design and improve health systems, at all levels, to achieve optimal care for all.

Panel Discussion

Sonia Kumar-Seguin
Dr. Mark Dermer
Dr. Onil Bhattacharyya
Dr. Trixie Gregoire
8:45 - 10:15

Connected Physicians, Connected Patients

Speakers will explore how they’re leveraging technology to disrupt traditional healthcare delivery and support better health outcomes and share real-life examples of how connectivity and innovation are leading to better care. Participants will also have the opportunity to share their perspectives on connectivity.

In this session participants will:

- Discuss innovative approaches for leveraging digital technologies to improve patient-physician connectivity and better system integration;
- Describe how improved connectivity using digital technology leads to better health outcomes;
- Identify ways to overcome barriers to better physician-patient connectivity.

Break and Grand Central

All Participants

10:15 - 10:45

Grand Central

A hub to share your ideas, ask questions, and forge meaningful and lasting connections with all participants to spark unprecedented change and shape the future landscape of health and medicine in Canada.

In this session participants will:

- Appraise and critique Canadian innovators, success stories, and changemakers through deep-dive discussions with speakers on the Grand Central Stage;
- Determine how innovative technologies and approaches can be applied in various health care settings by engaging with the content on the Grand Central Interactive Wall;
- Identify next steps and potential actions with participants to advance key takeaways from the sessions by connecting with fellow attendees and participating in stimulating dialogue in the Grand Central Meet Up space.

Keynote Presentation

Dr. Alexandra Greenhill

10:45 - 11:30

Can AI Improve the Health Care Experience?

Hear how AI and AI-enabled digital platforms can address fragmentation of care while also promoting good health.

In this session participants will:

- Examine how AI is being used in many health care settings and improving the experience for both physicians and patients;
- Describe how AI-enhanced health applications can address issues of fragmentation and coordination of care;
- Determine how AI can support team-based care.

Dr. Samir Sinha
Jaime Libaque
Dr. Matthew Chow
Kirsten Funk
Dr. Andrew Bond
Jesse Thistle

12:30 - 2:00

Connecting Care When Facing Medical Complexity and Social Vulnerability

Canadians require care and support services that are integrated. Speakers will offer insights into the essential elements needed to integrate services into a high functioning system of care, as well as the challenges and opportunities to spread new approaches. The discussion will focus on care for the elderly, mental health services for children and youth and people experiencing homelessness.

In this session participants will:

- Discuss approaches/strategies used by physicians, other health and social providers, patients and caregivers to integrate care in their community;
- Describe the barriers that need to be addressed to better integrate care;
- Consider opportunities to spread these strategies to better integrate care in community-practice.

2:30 - 4:00

Doctors and Patients as Information Specialists – Optimizing Communication

Physicians and patients both have a role to play in ensuring that information is communicated effectively. Speakers will talk about their own experiences and highlight innovative approaches that foster effective information exchange.

In this session participants will:

- Examine how good communication and information is at the heart of the patient-physician relationship;
- Outline team-based communications and the role of communications during transition in care;
- Describe the barriers, including system-level issues, that need to be addressed to ensure optimal communication;
- Identify opportunities and share innovative approaches to foster improvements in information exchange in the healthcare context.

4:00 - 5:00

Building Better, Stronger and More Connected Communities

Innovation and exponential growth are causing disruption. How do we embrace change in a time when technologies as diverse as robotics, the Internet of Things, big data, and Artificial Intelligence are having a critical impact of society? How can we connect and scale up knowledge and take part in building stronger and more connected communities?

In this session participants will:

- Reflect on how innovation can enhance human connections in health and in society;
- Discuss how social connections have a powerful effect on our health, happiness, and wellbeing.

Keynote & Networking Reception

Hayley Wickenheiser

5:30 - 7:30

Change as a Path to Greatness

Get inspired by the journey of Hayley Wickenheiser – from her career as one of the best female hockey players to her continued involvement as a community leader, businesswoman and, now, medical student.

Dr. Charles Alessi

8:00 - 9:30

How Does Canada Compare With Other Health Care Systems?

Learning from other health systems is key to progress and system improvements. While Canadians cherish their health care system, is our love affair ill-founded? Comparing our outcomes with international counterparts can reveal some solutions and gaps that should inform future direction and policy decision.

In this session participants will:

- Reflect on the current Canadian healthcare system as it compares to systems employed in other jurisdictions;
- Consider solutions that may be employed in the Canadian context.

Dr. Evan Adams

10:00 - Noon

Dialogue on Virtual Care in Canada

A discussion on the current state of virtual care in Canada, and the challenges it creates. Canada must be prepared to embrace virtual care and innovation. This may require, among other things, a review of the way physicians are licensed in this country. Explore the solutions to improve the adoption of virtual care and help shape the work of the joint CMA, Royal College and CFPC Virtual Care Task Force.

In this session participants will:

- Discuss the current reality of virtual care in Canada;
- Debate solutions to improve access to care, including virtual care.

Politically Connected: Getting Health Back on the Agenda

With the federal election scheduled for the fall of 2019, what are the health issues that should be debated? Speakers will share their insights into the issues expected to dominate the lead up to, and during, the election campaign.

In this session participants will:

- Discuss how physicians, other health providers and patients can engage in effective advocacy work and bring about change in the context of the 2019 election campaign;
- Examine the political climate leading to the election and how it will impact the campaign;
- Describe the issues that should be debated by candidates to improve access and quality of care and achieve better health for Canada's population.

Where to Now? Embracing New Opportunities

In a time when technologies as diverse as robotics, the Internet of Things, big data, and AI are having a critical impact of health care, how can we support physicians and patients to connect knowledge, leverage new opportunities, and take part in the health care transformation process?

In this session participants will:

- Reflect on the future of health and how to prepare for even more changes and disruption;
- Describe how new technologies are having an impact on health care delivery and the relationship between physicians and patients;
- Discuss how to embrace change and drive transformation now and into the future.
